Ethan M Roberts

ethan.m.roberts68@gmail.com - LinkedIn - Portfolio - (949) 429-2766

Summary

Data scientist focused on experimentation, causal inference, and forecasting for product and business decisions.

Skills

Programming: SQL, Python, R, Pandas, Numpy, Scikit-Learn, PyTorch, Git, HuggingFace
DS & Statistics: Causal Inference, Experimentation, Marketing Mix Modeling, Synthetic Controls, Bayesian Modeling, Time Series Forecasting, Predictive Modeling, Machine Learning
Tools & Business: Snowflake, AWS, ETL, Tableau, Process Optimization, Project/Team Management

Work Experience

Paramark - Founding Solutions Engineer (Data Science & Analytics) - *San Francisco, CA* 05/2025 - Current

- Developed marketing measurement frameworks using causal inference, MMM, synthetic controls, and geo experiments supporting budget allocation decisions
- Designed statistical diagnostics for synthetic control experiments, including credible interval stability testing, control coherence analysis, and leave-one-out sensitivity evaluation
- Partner with product and engineering teams to design scalable measurement and analytics platform capabilities supporting enterprise marketing organizations
- Increased weekly customer deliverable throughput 2× by automating analytics workflows and building internal decision-support systems across customer engagements
- Hired, trained, and mentored new engineers while developing team processes, documentation, and operational standards

Georgia Institute of Technology - Instructional Associate - *Remote, CA* 06/2024 - 01/2026

- Taught graduate-level machine learning, statistics, and business analytics coursework

Netbase Quid - Senior Business Analyst - *Santa Clara, CA* 11/2021 - 11/2024

- Developed and deployed forecasting systems using time-series and machine learning methods, improving finance forecast error from 16% to 1.5% and reducing forecasting effort by 85%
- Built automated forecasting pipelines spanning data ingestion, validation, model selection, and reporting workflows used by Finance and Sales teams

iPayables, Inc - Revenue Operations Analyst - *Aliso Viejo, CA* 4/2019 - 10/2021

- Designed and implemented A/B tests for marketing assets, increasing click-through rate from 5% to 13% on ads and 15% to 22% on whitepaper campaigns
- Built GTM reporting and data storage workflows that increased sales pipeline by 20% and leads by 540%

Projects

Complainalyzer - Developed an NLP and forecasting pipeline combining topic modeling, sentiment analysis, and time-series forecasting to detect emerging consumer finance issues and predict complaint volumes.
Semantic Recommendations - NLP recommendation system using transformer embeddings and similarity search to generate personalized recommendations from unstructured user inputs

Education + Awards

Georgia Institute of Technology - Master of Science – Data Science & Analytics
Brigham Young University Hawai'i - Bachelor of Science – Computer Science
Eagle Scout - Boy Scouts of America
